

Case Report Cover Note

To help focus interactive feedback we are trialling an *optional* short *cover note* for this case report submission. This should be *no more than 200 words* and should detail aspects which you found difficult on writing this report, or points you may wish to have specific feedback or guidance from your examiners. You may use bullet points and grammar and spelling are not critical. Importantly *this does not form part of your assessment*.

Aspects to consider...

- Case report structure (word limits, order of differentials, clinical outcome vs critical reflection, what to include/leave out)
- Case report content (case suitability, economic or other limitations)
- Previous feedback which you have tried to address

Examples are...

- "I struggled with the word count and found that I was not able to cover everything I wanted to cover in my discussion, so I focussed on point X and Y, but should I have focussed more on Z instead?"
- "I was given feedback in my last case report that my DDx list needed work and have tried to improve this but still think it's not quite right..."
- "I struggled with case selection... is this case ok?"

Please put this note in the same case report document that you upload to Turnitin, but place at the very top of the page, clearly titled "Case Report Cover Note". Please include a word count and remember the strict limit of 200 words.
