

2016 summer research internship program for UG- University of Liverpool

1. What do you think this program helped you the most with?

Getting involved in this program brought about numerous benefits for me. During this process, I learned how to conduct research, how to cope with unexpected events (such as members' dropping out and Brexit), and also how to celebrate the successes of our report and presentation.

More than that, this program gives me a sense of belonging and fulfillment. I met new people from different cultures and different perspectives and got familiar with wonderful teachers, conductors and also PhD students.

- Finally, I know more about what to expect from a career in research and was more determined to continue my study in this field.
2. What are the highlights of the experience?

The presentation we made for staff of Barnett Waddingham. It acts like a short term goal for the whole process of the research and also a formal ending.

I gained confidence in practicing and preparing for the presentation. My spoken English has improved and more than that, I'm more confident to speak in English and also to talk in front of some audiences.

3. What would you recommend to improve in the program?

Deciding topic for each group before training session might be better. Since I believe it is better to firstly know what we want to do and how would we do, and this understanding would be an incentive to focus on the most useful part and make good use of the training session.

4. Would you recommend it to your fellow students?

Yes, and I have already recommended it to some of my fellow students.

5. Did you find it helpful to work in a team?

Yes, definitely.

There will be more thoughtful ideas through teamwork because different person might have different perspective on a same task, and it is really amazing to share my own idea and listening others' different and creative ideas.

More than that, higher efficiency, greater effectiveness, greater sense of belonging and so on can be achieved to work in a team, compared to work alone.

6. What was the most difficult part about the program?

We didn't receive much guidance on what we should do next during the whole process. However, I think this is also an amazing part of the research program. Although it is difficult to decide topic, methodology and find out a reasonable result by ourselves, it is amazing to think questions independently and find out methods by ourselves. This kind of freedom to think really attracts me as in the previous study experience, I was always limited by the ideas given by teachers or books. But in this research program, we can try our own ideas and get help to improve the idea instead of just being given the idea.

7. Anything else you would like to mention.

2016 summer research internship program for UG- University of Liverpool

1. What do you think this program helped you the most with?

Improvement of understanding of professional knowledge and other capabilities, such as communication skills and time team spirit.

2. What are the highlights of the experience?

The last presentation at Barnett Waddingham company.

3. What would you recommend to improve in the program?

Six weeks could be expanded to eight weeks, which would give us more time to create a better model.

4. Would you recommend it to your fellow students?

Yes

5. Did you find it helpful to work in a team?

Yes, work in team can create more ideas and work more efficient

6. What was the most difficult part about the program?

The most difficult part is the determination of methodology. More specifically, we need work out our own method which transform raw data to some data we want and we should choose most appropriate model to explain this data and predict future.

7. Anything else you would like to mention.

2016 summer research internship program for UG- University of Liverpool

1. What do you think this program helped you the most with?

practise team work skill, programming skill

2. What are the highlights of the experience?

wonderful and meaningful

3. What would you recommend to improve in the program?

May be have some tutorial during the program

4. Would you recommend it to your fellow students?

Yes

5. Did you find it helpful to work in a team?

Yes

6. What was the most difficult part about the program?

To build the model and apply the real data
using some programming skill

7. Anything else you would like to mention.

2016 summer research internship program for UG- University of Liverpool

1. What do you think this program helped you the most with?

This program provides me a great chance to have a insight about how to use mathematics in the real world, and it helps me figured out what kind of job I am really interest in.

2. What are the highlights of the experience?

The most impressive part of the whole program is that the last day we went to BW office and made a well-prepared presentation. everyone in the team showed our result and their best to the audience. Coffee time with Corina is also a great part.

3. What would you recommend to improve in the program?

Maybe the lecture time in the program could ~~reduce~~ be reduced to one week, I think the point is let the ~~particip~~ participants of the program learn to ~~research~~ research and to study something by themselves.

4. Would you recommend it to your fellow students?

Definitely! It would be a unforgettable experience for anyone who ever have a chance to join it.

5. Did you find it helpful to work in a team?

Of course. Everyone have their ~~advantages and disadvantages~~
advantages and disadvantages.
Collaborate with others is very useful.

6. What was the most difficult part about the program?

The most difficult part about the program is that
we did not get enough resources to support our
research. for example, we ~~do~~ did not get enough
data to run the simulation.

7. Anything else you would like to mention.

~~It was~~ great six weeks
with everybody!

2016 summer research internship program for UG- University of Liverpool

1. What do you think this program helped you the most with?

The most the program helped me ~~was~~ scientific analytics.
learn how to

2. What are the highlights of the experience?

Everyone worked hard and prepared all we have on presentation. Then the day we gave the presentation is amazing.

3. What would you recommend to improve in the program?

1. Curtail the weeks of reading books, but do some more programming tutorials.

4. Would you recommend it to your fellow students?

Yes !!! Of Course !!!

5. Did you find it helpful to work in a team?

Yes, I did. Learned ~~to~~ how to communicate with group members and study a lot from them.

6. What was the most difficult part about the program?

1. data ~~cleansing~~ cleansing.
2. Presentation (But we make it anyway!!!)
3. Some programming part.

7. Anything else you would like to mention.

No. Everything was perfect!!!

I love all of them.

2016 summer research internship program for UG- University of Liverpool

1. What do you think this program helped you the most with?

Give me a really good experience, especially introduced me to some entrepreneurs, which gave me lots of advice on my future career.

2. What are the highlights of the experience?

Worked with entrepreneur and ~~too~~ ^{got} along with lectures and phds.

Helped me find where my skills are.

3. What would you recommend to improve in the program?

Provide more students this opportunity ^{which is} as work as intern in some companies.

4. Would you recommend it to your fellow students?

Yes, definitely

5. Did you find it helpful to work in a team?

Yes, dealing with some tasks as a group sometimes ~~was~~ is very helpful as dealing with these tasks by yourself sometimes is hard and go wrong easily.

6. What was the most difficult part about the program?

Sorry, but can't ~~think~~ come up with some difficult part.
This internship is always being ~~enjoy~~ enjoyable for me.
Plus, Charles is always helpful and taught us a lot.
The most difficult part is my english is not perfect enough.

7. Anything else you would like to mention.

Corina is also very helpful, and I'm so appreciated for this opportunity.

But I'm still confused about my future career
and my coffee with corina ~~is~~ lasted only about 3 minutes.
So can I have another coffee with corina?

Ariel,
