

Year two Semester two:

Consider your progress through the course - are there any issues or concerns you have?

Where do you think your strengths lie?

Now consider your third year module choice.

How do these modules align with your prospective career plans?

Why have you considered these modules in the context of the modules you have already taken?

Are there any concerns or issues you have about the coming year?

Where can you improve your performance?

Are there any areas you feel the need to concentrate on?
