

## Exercise 4.5b) Hint

The first **for** statement is a modification of the one in the examples involving **SumSoFar**: you just need to take **i** to be in **list1** rather than going from 1 to 10.

For the second **for** statement, modify your first one by inserting an **if** along the lines of

```
if i>0 then      #For positive elements
  SumSoFar := ... #Add element to the sum so far
end if
```
