uniform distribution theory

SECOND INTERNATIONAL CONFERENCE ON
UNIFORM DISTRIBUTION THEORY

STROBL AM WOLFGANGSEE, AUSTRIA, JULY 5–9, 2010, Part II

Published by

BOKU – University of Natural Resources and Life Sciences (Vienna)
and
Mathematical Institute of the Slovak Academy of Sciences (Bratislava)

THE AIM OF UNIFORM DISTRIBUTION THEORY

The aim of this journal is to publish original research papers on various aspects of uniform distribution theory, especially theoretical and computational aspects of combinatorial, diophantine and probabilistic number theory. In particular we welcome submissions on the following topics:

- Distribution of one dimensional and multidimensional sequences
- Distribution of binary sequences
- Distribution of integer sequences and sequences from groups and spaces
- Distribution problems in finite abstract sets
- Continuously uniform distributions
- Discrepancies
- Pseudo-random number generators
- Quasi-Monte Carlo integration
- Quasi-Monte Carlo methods in financial mathematics
- Theory of densities
- Theory of distribution functions of sequences
- Distribution of integer points in large domains
- Spectral properties of sequences
- Dynamics emerging from sequences
- Number theoretic ciphers and codes
- Combinatorial number theory
- Trigonometric sums
- Diophantine approximations and diophantine equations
- Continued fractions
- Quantum chaos

In terms of the AMS subject classification, the main subject areas supported are 11K, 11J, 11B and 11L. The journal is published by The BOKU-University of Natural Resources and Life Sciences in cooperation with other supporting organizations in both electronic and paper form. One volume of two issues is published annually.

The journal is covered by Zentralblatt MATH and by Mathematical Reviews.

INFORMATION FOR AUTHORS

Manuscripts should be submitted with the completed form of the file **submitUDT.tex** by email to a member of the editorial board or directly to the managing editors. Submission must be in **PDF** form. If your article is accepted for publication, please send the final version in the form of a **LaTeX** file to the managing editors. Authors are requested to provide an abstract, keywords and the most up to date AMS subject classification. All submissions will be refereed.

Copyright: To be considered for publication articles must not have been published anywhere else. In addition, they must not be currently under consideration for publication elsewhere. By submitting a manuscript, the authors agree to the copyright for their articles being transferred to the publisher, if the paper is accepted for publication.

The journal is covered by Zentralblatt MATH and by Mathematical Reviews.
